

Jiaming Liu

Tel: (+1)314-203-5469
Email: jiaming.liu@wustl.edu
Address: 9015 Eager Rd. APT 311,
St. Louis, MO.
Homepage: jiamingliu.github.io
Google Scholar: scholar.google.com/jiaming.liu

RESEARCH INTERESTS

Computer Vision, Computational Imaging, Deep Learning, Signal/Image Processing, Large-scale Optimization.

EDUCATION

Washington University in St. Louis (WUSTL) , St. Louis, MO, USA Ph.D. student in Electrical & Systems Engineering Advisor: Prof. Ulugbek Kamilov	Aug. 2019 – Expected 2023
WUSTL, St. Louis , MO, USA M.S. in Electrical & Systems Engineering	Aug. 2017 – Dec. 2018
University of Electronic Science and Technology of China (UESTC) , Chengdu, China B.S. in Electronic and Information Engineering	Sep. 2013 – Jun. 2017

WORK EXPERIENCE

Mitsubishi Electric Research Laboratories (MERL) , Cambridge, MA, USA Research Intern Mentor: Dr. Tim Marks	May. 2023 – Aug. 2023
Lawrence Livermore National Laboratory (LLNL) , Livermore, CA, USA Research Intern Mentor: Dr. Rushil Anirudh	Jun. 2022 – Aug. 2022
Los Alamos National Laboratory (LANL) , Los Alamos, NM, USA Research Intern Mentor: Dr. Brendt Wohlberg	Jun. 2021 – Aug. 2021

AWARDS & HONORS

NeurIPS 2022 Scholar Award, NeurIPS 2019 Travel Award, WUSTL Dean's Select PhD Fellowship, 2019

RESEARCH EXPERIENCE

• Model-based Deep Learning Methods

- Proposed DOLCE, a new conditional *diffusion probabilistic model* based framework for limited-angle computational tomography. This work was performed on LLNL HPC with distributed training.
- Proposed ODER, a first *online deep equilibrium RED* framework for data-intensive imaging modalities that adopts stochastic processing of measurements within an implicit neural network.
- Provided a *coordinate-based internal learning* (CoIL) method for continuously representation of the measurement field, inspired by neural representation fields (NeRF).
- Proposed and analyzed SGD-Net as a new methodology for improving the efficiency of deep unfolding through stochastic approximations of the data-consistency layers.

- Proposed RARE algorithm to broaden the current denoiser-centric view of RED by considering priors corresponding to networks trained for more general artifact-removal on datasets containing only undersampled measurements.
 - Proposed to considerably improve the performance and stability of deep image prior (DIP) by incorporating traditional total variation (TV) regularization.
- **Plug-and-Play priors (PnP) and Regularization by Denoising (RED)**
 - Established theoretical recovery guarantees for PnP by assuming that the solution of these methods lies near the fixed-points of a deep neural network (i.e. denoisers and artifact removal operators).
 - Studied and provided a practically efficient denoiser scaling technique to explicitly control the amount of PnP regularization (noise level σ).
 - Improved RED efficiency by providing various scalable RED algorithms for large-scale image reconstruction, including stochastic, block-coordinate, and asynchronous distributed variants.
 - Proposed a new Calibrated RED (Cal-RED) method that enables joint calibration of the measurement operator along with reconstruction of the unknown image.

TECHNICAL SKILLS

- Proficient with programming languages: Java, Python, C Programming, Matlab.
- Proficient with deep learning frameworks: Pytorch/Pytorch Lightning, TensorFlow, and Jax.
- Five years of experience in computer vision, deep learning, optimization, inverse problems and medical imaging.
- Fluency in imaging modality: single image super-resolution (SR), image deblur, compressive sensing, CT/MRI.

APPLICABLE COURSEWORK

- *Sparse Modeling for Imaging and Vision*
- *Machine Learning*
- *Probability and Stochastic Process*
- *Biological Imaging Technology*
- *Algorithms for Nonlinear Optimization*
- *Mathematics of Imaging Science*
- *Digital Signal Processing*
- *Topology*
- *Optimization*
- *Stochastic Process*
- *Digital Image Processing*

PROFESSIONAL SERVICES

Reviewer for journals

Neurocomputing, Neural Computing and Applications (**NCAA**) , Optical Communication, IEEE Transactions on Image Processing (**TIP**), IEEE Transactions on Signal Processing (**TSP**), International Journal of Intelligent Systems (**IJIS**), IEEE Transactions on Computational Imaging (**TCI**), Applied Mathematical Modelling.

Reviewer for conferences

International Conference on Machine Learning (**ICML**), International Conference on Learning Representations (**ICLR**), Neural Information Processing Systems (**NeurIPS**), IEEE/CVF Computer Vision and Pattern Recognition Conference (**CVPR**), IEEE International Conference on Acoustics, Speech and Signal Processing (**ICASSP**), IEEE International Conference on Image Processing (**ICIP**), IEEE International Symposium on Biomedical Imaging (**ISBI**), IEEE/CVF International Conference on Computer Vision (**ICCV / ICCV Workshop**).
